DETAILED ACTION

- 1. This communication is responsive to Amendment filed 09/07/2004.
- 2. Claims 1-25 are pending in this application. Claims 1-2, 10-11, and 19-20 are independent claims. In Amendment, claims 2, 11, and 20 are amended. This action is made final.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1, 7-10, and 19 are rejected under 35 U.S.C. 103(a) as being obvious over Weber (U.S. 4,438,501) in view of Yada (U.S. 5,481,568).

Re claim 1, Weber discloses in Figure 1 a method of filtering over-sampled data (abstract) comprising: receiving a word including a plurality of sample bits for each of a plurality of data bits (col. 1 lines 6-9); detecting a sample bit having one logic value and, on either side of it, bits having the opposite logic value (col. 1 lines 6-20 and col. 9 lines 3-15); and outputting the received word with the sample bit having said one logic value inverted (col. 8 lines 65-70). Weber does not disclose the word is an over-sampled data. However, Yada discloses in Figure 4 an input word is an over-sampling data (part 10 in Figure 4, Figure 2(b), and col. 6 lines 54-60) entering a filter (abstract) for extracting

Application/Control Number: 09/750,090

Art Unit: 2124

desired data. Therefore, it would have been obvious application to a person having ordinary skill in the art at the time the invention is made to apply or add over-sampling data into Weber's invention because it would enable to correct any undesirable sequence or irregular sequence and provide a desired sequence without loss of integrity (abstract).

Re claim 7, it has same limitation cited in claim 1. Thus, claim 7 is also rejected under the same rationale in the rejection of rejected claim 1.

Re claims 8-9, Weber does not disclose in Figure 1 a step of receiving word from an over-sampler or between two over-samplers wherein the over-sampled data is USB 2.0 data. However, the examiner takes an official notice that the technique of selecting data from multiple input source as over-samplers and USB 2.0 data are known in the art. Therefore, it would have been obvious application to a person having ordinary skill in the art at the time-the invention is made to apply difference data as USB 2.0 or samplers into Weber's invention because it would enable to correct any undesirable sequence or irregular sequence and provide a desired sequence without loss of integrity (abstract).

Re claim 10, it is an apparatus claim of claim 1. Thus, claim 10 is also rejected under the same rationale in the rejection of rejected claim 1.

Re claim 19, it is a computer readable memory containing program instruction claim of claim 1. Thus, claim 19 is also rejected under the same rationale in the rejection of rejected claim 1.

Allowable Subject Matter

5. Claims 2-6, 11-18, and 20-25 are allowed.

Art Unit: 2124

Response to Arguments

- 6. Applicant's arguments filed 09/07/2004 have been fully considered but they are not persuasive.
 - a. The applicant argues in page 10 first paragraph for claims 1, 10, and 19 that the reference by Weber in general does not disclose, teach, or suggest the detection a sample bit having one logic value and, on either side of it, bits having an opposite logic value and outputting "the received word" with the one logic value inverted.

Conclusion

7. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chat C. Do whose telephone number is (703) 305-5655. The examiner can normally be reached on M => F from 7:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chaki Kakali can be reached on (703) 305-9662. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
